PUT THE BOUNCE BACK INTO YOUR SPORT

REJUVENATION

After

Before

Before

After

Rejuvenation is a patented process which revives your compacted, flooded or damaged synthetic surfaces, fully refreshing pile fibre and replenishing surface in-fill with clean sand.

www.hasports.co.uk

H & A Sports Surfaces Ltd. has successfully rejuvenated over 400,000 square metres of synthetic surfaces throughout the UK. Football, hockey, tennis and multi-sport surfaces alike have all benefited from a cleaning and replacement of in-fill, at a substantially lower cost than an entire sports pitch replacement.

THE REJUVENATION PROCESS

STAGE 1

We remove the upper 8-10 mm of contaminated sand using a carefully balanced mixture of compressed air and water vapour. This process delivers the soiled sand to the surface for disposal.

STAGE 2

A specialised sweeping unit follows and collects the contaminated sand from the surface. The sweeping unit simultaneously brushes the pile fibre back into upright position.

STAGE 3

The contaminated sand is removed from the playing surface and can be recycled onto natural grass areas or disposed of off-site.

STAGE 4

In the last stage we refill the synthetic surface with new silica sand. The pile fibre and sand are both refreshed, breathing new life into your sports pitch for years to come.

About Us

We are the longest established specialist sports surface company in the country and have been at the forefront of the installation and maintenance of synthetic sports surfaces since 1973.

We have a vast amount of experience in the installation, maintenance and rejuvenation of every type of synthetic surface.

Each year we install over 100,000 square metres of new ground surface and rejuvenate dozens of hockey pitches, tennis courts and football pitches.

Our highly skilled crews are in demand all over the world and we have installed sports surfaces in France, Madeira, the West Indies, South Africa, Martinique and Eire as well as the UK.

We work with leading manufacturers across the world.

Our mission is to provide you with an installation and maintenance service that is second to none.
