# H & A SPORTS SURFACES

**SPECIALISTS IN SYNTHETIC SURFACES**

Maintenance

Installation

Renovation

Rejuvenation

Carpet Repair

Surface Inspection

Moss Treatments

New Surfaces

In-fill Extraction

Fencing

Established in 1973

H & A have been at the forefront of the installation and maintenance of synthetic sports surfaces for more than 20 years. During 2003 we installed in excess of 50,000 square meters of new ground surface and rejuvenated 20 full size Hockey Pitches and 40 Tennis Courts. Our highly skilled crews are in demand all over the World and to date have installed new sports surfaces in France, Madeira, the West Indies, South Africa and Martinique as well as the U.K. and Southern Ireland.

- AVOID :** poor drainage • increased wear • in-fill contamination  
 • poor appearance • algal & moss build-up • in-fill compaction  
 • slippery conditions • player risk

**Extend the life of your sports surface and maintain the playing qualities**

**PUT THE BOUNCE BACK INTO YOUR SPORT**

**REJUVENATION**

When the in-fill in your synthetic surface becomes hard and compacted it has to be replaced. The signs to look for are stiffness in the carpet, surface contamination, slow drainage and the appearance of moss and algae, when one or more of the former occurs then it is time to consider rejuvenation.

**THE PROCESS**

- 1 Firstly the surface is sprayed 2-3 weeks prior to cleaning to kill all moss and algae.
- 2 The surface is then swept to remove all surface debris
- 3 Our purpose built machine then injects a mixture of compressed air and water into the carpet pushing the contaminated in-fill onto the top to be collected and disposed of by our sweeping unit.
- 4 In-fill is replaced using new material.

**THE COST**

The entire process costs approximately 10 to 15% of the cost of a new surface. After rejuvenation your playing surface should ( subject to regular maintenance ) give you an additional 6-7 years problem free use.

**WHY - H & A ?**

Below are extracts from the marketing literature of other companies advertising rejuvenation.

**( A )** H&A Sports Surfaces of Southern Warwickshire, has now signed a Licence Agreement to operate the Charles Lawrence patented Rejuvenation Process in Great Britain. H & A Sports Surfaces has itself been operating in the maintenance sector for many years and has built an excellent reputation in that time.\*

\* Industry News December 02 2002

**( B )** The contaminated in-fill material is extracted from the surface to an approximate depth of 10 mm using an H & A rejuvenation machine. The extracted in-fill material is removed from the synthetic area.

When H & A rejuvenates a surface we use our own machinery and staff, so you get 20 years of experience as well as benefiting financially.

**Build up of moss and contaminated sand**

**In-fill Extraction**

**Installation of 6 bay Cricket cage for Lancing College**

**In-fill Collection**

**Before / After Extraction**

**Classic Clay Court - Paris**

**2 Tone Sand Filled Court**

**Sand Collection**

**Crazy Golf Course at Pontins**

**Before and after Rejuvenation of a Tennis Court**

**Carpet Installation**

**After Rejuvenation**

**Sand filled Soccer Pitch - Madeira**

**CRICKET**

Our Cricket Division concentrates solely on the design and installation of Cricket strips and cages, offering a wide range of surfaces to suit your needs. Our team leader ( who is a member of the Institute of Groundsmen ) will tailor make a solution to match your requirements.

**TENNIS**

Our Tennis Division carries out ground work, installation, resurfacing plus rejuvenation on courts both here and abroad. The installation team are the only one to install both the artificial Euro Clay and Classic Clay courts all over the world, offering 30 years of experience in the Tennis sector.

**GOLF**

One of H & A's first major projects was the construction of the Belfry Golf course near Sutton Colefield in the West Midlands. Now we specialise in the design, construction and resurfacing of crazy and miniature golf.

We can offer a wide range of different surfaces to meet the desired effect.

We also supply and install Tee Mats for driving ranges and safety surfaces for child play areas.

**HOCKEY & FOOTBALL**

Some of the very first synthetic sports grounds are now due for replacement, H & A are able to lift and dispose of your old material, replacing it with a new generation pitch using either a sand or rubber in-fill. During the past 10 years the quality of artificial surfaces has improved dramatically ensuring a hard wearing surface with longevity.
