# TENNIS

At H&A we understand that a tennis court is an asset that adds value to your home or commercial centre. It is our aim to provide high quality surfaces that you "want" to play on resulting in years of personal enjoyment for both the novice and competition players.

**GRANDSLAM:** As the name suggests, Grandslam is the ultimate synthetic grass tennis court surface, specifically developed to provide the highest possible quality and comfort. The densely tufted polypropylene provides superior traction underfoot and makes Grandslam a picturesque asset for your home with the playing characteristics of a championship court.

**PROTOUR:** Have you ever dreamed of playing on the pro tour? Now you can with this close weave 15mm pile height product that is designed for the tennis player. With a proven ratio of polypropylene to sand, Protour offers a consistent medium-paced ball bounce and provides excellent stability with controlled slide. Protour responds to all standards of play and exceeds the requirements set for synthetic tennis court surfaces.

**SATELLITE:** The 19mm pile height synthetic grass surface that is one step above the rest. Satellite is a medium paced surface that responds to the natural spin of the ball and provides additional slide for the player on the court. Satellite defines the feeling of enjoyment and ease of movement similar to that of the traditional clay court.

## About Us

We are the longest established specialist sports surface company in the country and have been at the forefront of the installation and maintenance of synthetic sports surfaces since 1973.

We have a vast amount of experience in the installation, maintenance and rejuvenation of every type of synthetic surface.

Each year we install over 100,000 square metres of new ground surface and rejuvenate dozens of hockey pitches, tennis courts and football pitches.

Our highly skilled crews are in demand all over the world and we have installed sports surfaces in France, Madeira, the West Indies, South Africa, Martinique and Eire as well as the UK.

We work with leading manufacturers across the world.

Our mission is to provide you with an installation and maintenance service that is second to none.
